The Detroit Diesel® Series 60 engine has been a popular on-highway engine due to its excellent fuel economy and high reliability. To ensure maximum reliability, as these engines age, it becomes very important to verify exhaust gas recirculation (EGR) system function as part of your normal maintenance routine.

Flight Diesel is now offering remanufactured Detroit Diesel® Series 60 EGR coolers that have undergone an 8-step remanufacturing process designed to provide same-as-new performance. Tested to O.E. specifications, these remanufactured EGR coolers will help ensure your engine is functioning to peak performance. These two part numbers will give your vehicle coverage from 1998 to 2009.

## The S60 EGR Cooler Undergoes the following processes

- All units are fully inspected
- Cleaned and flushed with dedicated/proprietary equipment
- Ultrasonic bath wash process
- Dried utilizing a thermal process
- Pressure tested to O.E. specs before and after with calibrated equipment
- Exterior cleaned – (No paint)
- Packaged with required attaching hardware
- Core charge is \$325 and criteria is off engine condition with no excessive rust, fire or manmade damage.

EPA Level	Model Year	Engine Series	Flight Diesel Part Number
EPA 04	2002-2006	S60	FSR23538835
EPA 07	2007-2009	S60	FSR23537387

Flow Tested to O.E. Specifications
