## 6.0L Power Stroke Turbochargers

Flight Diesel is offering remanufactured turbochargers for 6.0 Liter Power Stroke engines used in Ford diesel vehicles. Three part numbers cover applications from 2003 to 2007. These turbochargers go through our thorough remanufacturing process that ensure optimum quality and reliability.

- Complete Disassembly - Experienced turbocharger technicians disassemble each turbocharger and route the components through a multistep cleaning process
- Component Certification - All critical components are evaluated and recertified or replaced with brand-new components
- 2-Stage Balancing - Individual rotating wheel assemblies are low-speed balanced prior to final assembly and high-speed balancing
- High Speed Balancing - All complete cartridge assemblies are final tested on a high speed balancer in speeds exceeding 60,000 RPM
- 100% Actuator Replacement - All turbochargers include either fully remanufactured or new actuator
