## Ford® 7.3L High Performance Fuel Injector

Flight Diesel is currently offering remanufactured Ford® 7.3L High Performance Fuel Injectors. These injectors go through our thorough remanufacturing process that ensure optimum quality and reliability. These injectors have a new nozzle rated for 100% over stock fuel flow. This allows the fuel chamber to empty more quickly during an injection event.

- Each disassembled injector is processed keeping all components together to minimize part fit variation and maintain original performance
- Each performance injector receives a new solenoid, plunger, and barrel assembly
- After assembly, all injectors are 100% tested and data is recorded for critical engine application checkpoints, to assure a quality product
