## Duramax Turbochargers

Flight Diesel is offering remanufactured turbochargers for GM® Duramax 6.6 Liter engines used in Chevrolet® and GMC® diesel vehicles. Four part numbers cover applications from 2001 to 2010. These turbochargers go through our thorough remanufacturing process that ensure optimum quality and reliability.

- Complete Disassembly - Experienced turbocharger technicians disassemble each turbocharger and route the components through a multistep cleaning process
- Component Certification - All critical components are evaluated and recertified or replaced with brand-new components
- 2-Stage Balancing - Individual rotating wheel assemblies are low-speed balanced prior to final assembly and high-speed balancing
- High Speed Balancing - All complete cartridge assemblies are final tested on a high speed balancer in speeds exceeding 60,000 RPM
- 100% Actuator Replacement - All turbochargers include either fully remanufactured or new actuator
