## VT365 Turbochargers

Flight Diesel is offering remanufactured turbochargers for Navistar® VT365 engines used in medium duty vehicle applications. Two part numbers cover applications from 2002.5 to 2006. These turbochargers go through our thorough remanufacturing process that ensure optimum quality and reliability.

- Complete Disassembly - Experienced turbocharger technicians disassemble each turbocharger and route the components through a multistep cleaning process
- Component Certification - All critical components are evaluated and recertified or replaced with brand-new components
- 2-Stage Balancing - Individual rotating wheel assemblies are low-speed balanced prior to final assembly and high-speed balancing
- High Speed Balancing - All complete cartridge assemblies are final tested on a high speed balancer in speeds exceeding 60,000 RPM
- 100% Actuator Replacement - All turbochargers include either fully remanufactured or new actuator
